Certification

Before a foreign tax authority will accept a claim for entitlement to a treaty rate of taxation on cross border income, a claim must be supported by evidence of the claimant's legal form and residency for tax purposes. This is known as "Certification".

As cross border investment continues to grow, the need to manage international tax consequences is increasingly important in order to maximize investment returns. The impact generally ranges 40 - 150 basis points.

Double Taxation Treaties can often give rise to an entitlement to recover tax that has been overwithheld by foreign governments on investment income.

Process

While GlobeTax can act on behalf of the beneficial owner in many cases, in some instances some jurisdictions require the beneficial owner to obtain certification of residency and legal form prior to GlobeTax pursuing a claim.

Key metrics that affect the value (or reclaim) and length of the process include the certification process to evidence a beneficial owner's legal form and residency, Statutes of Limitations, and average recovery times.

Statutes

The average time you can go back and still recover tax on previous income yield. This multiplies your potential available recovery.

Notes:

There are many other factors, not listed here, that can affect overall time between recognizing an entitlement and realizing an entitlement.

There are four types of Statute calculation. The paydate of the income and calculation type may affect the actual date on which any claim entitlement expires.

Recovery Time

The market average time you can expect to wait AFTER a reclaim is filed before being paid. These are market averages. In most cases GlobeTax obtains refunds in shorter time periods.
